

```
classDiagram
    class IService {
    }
    class EmptyBox {
    }
    class EmptyBox2 {
    }
```

The diagram shows a UML class named `IService` represented by a rectangle divided into three horizontal compartments. The top compartment contains the text `IService`. The middle and bottom compartments are empty. To the right of the `IService` class, there are two empty rectangular boxes, one above the other, which are not connected to the `IService` class.

IService
